## Instructions

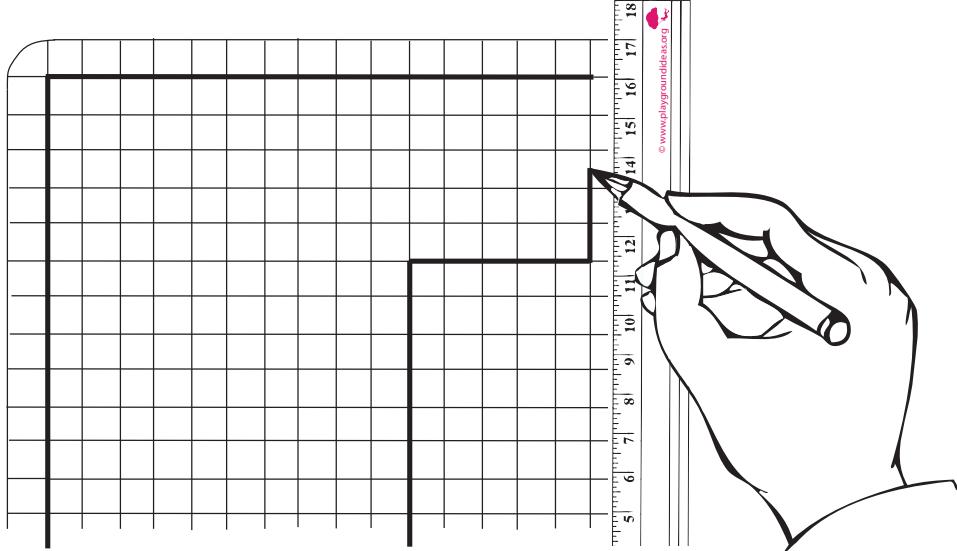

1.

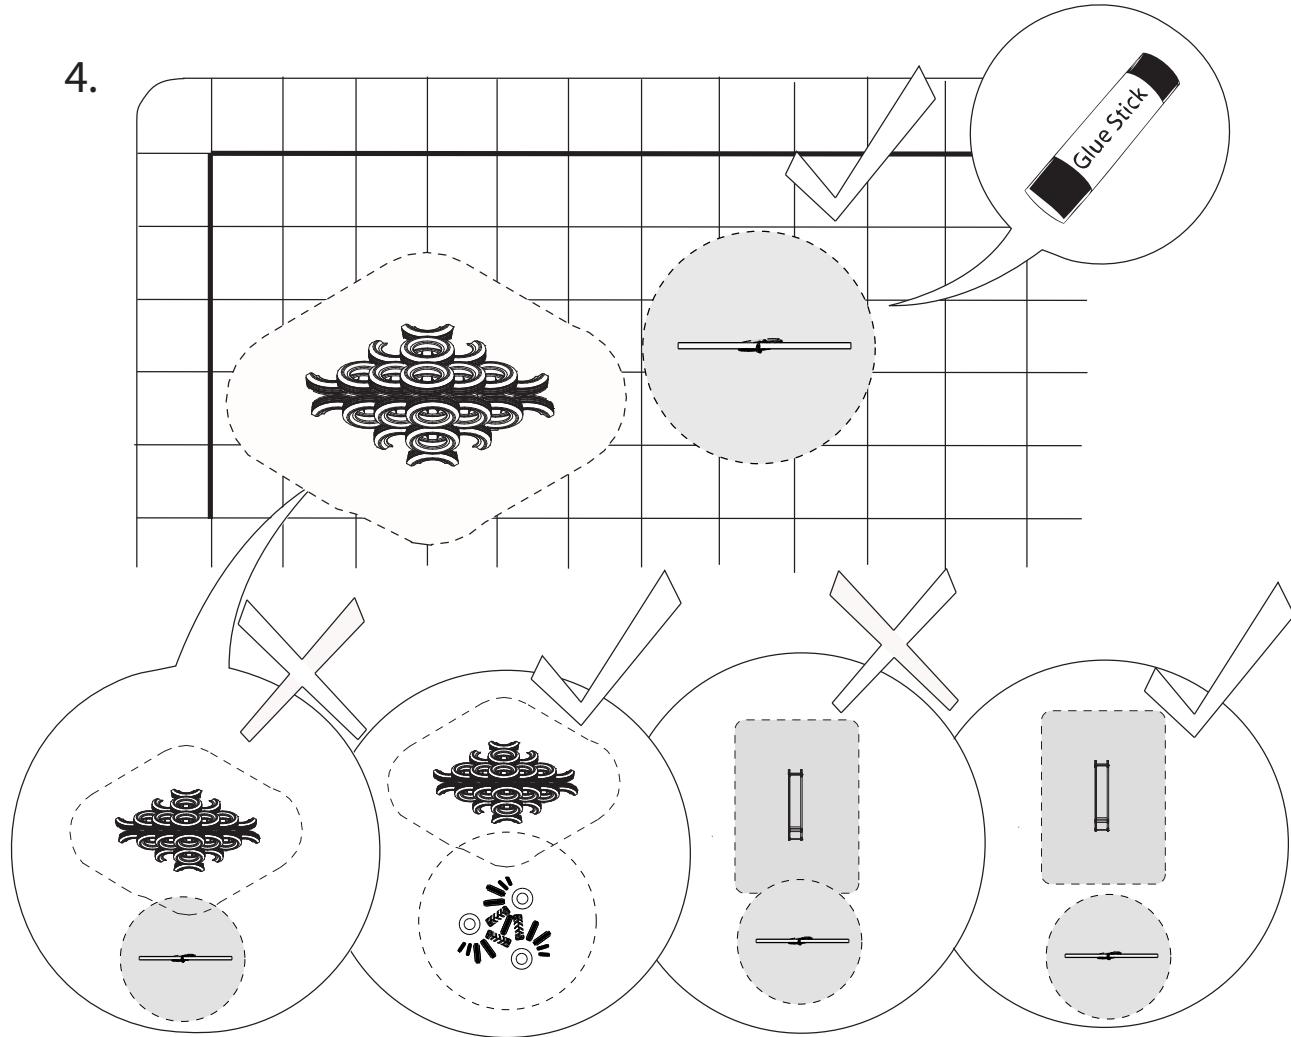

2.

3.

4.

Please note: Shaded elements CANNOT be overlapped by any other element.

Unshaded elements CAN overlap other unshaded elements, but still must maintain space between each other equal to the larger elements zone boundary.

Elements without a zone can be positioned anywhere but not inside another elements zone.

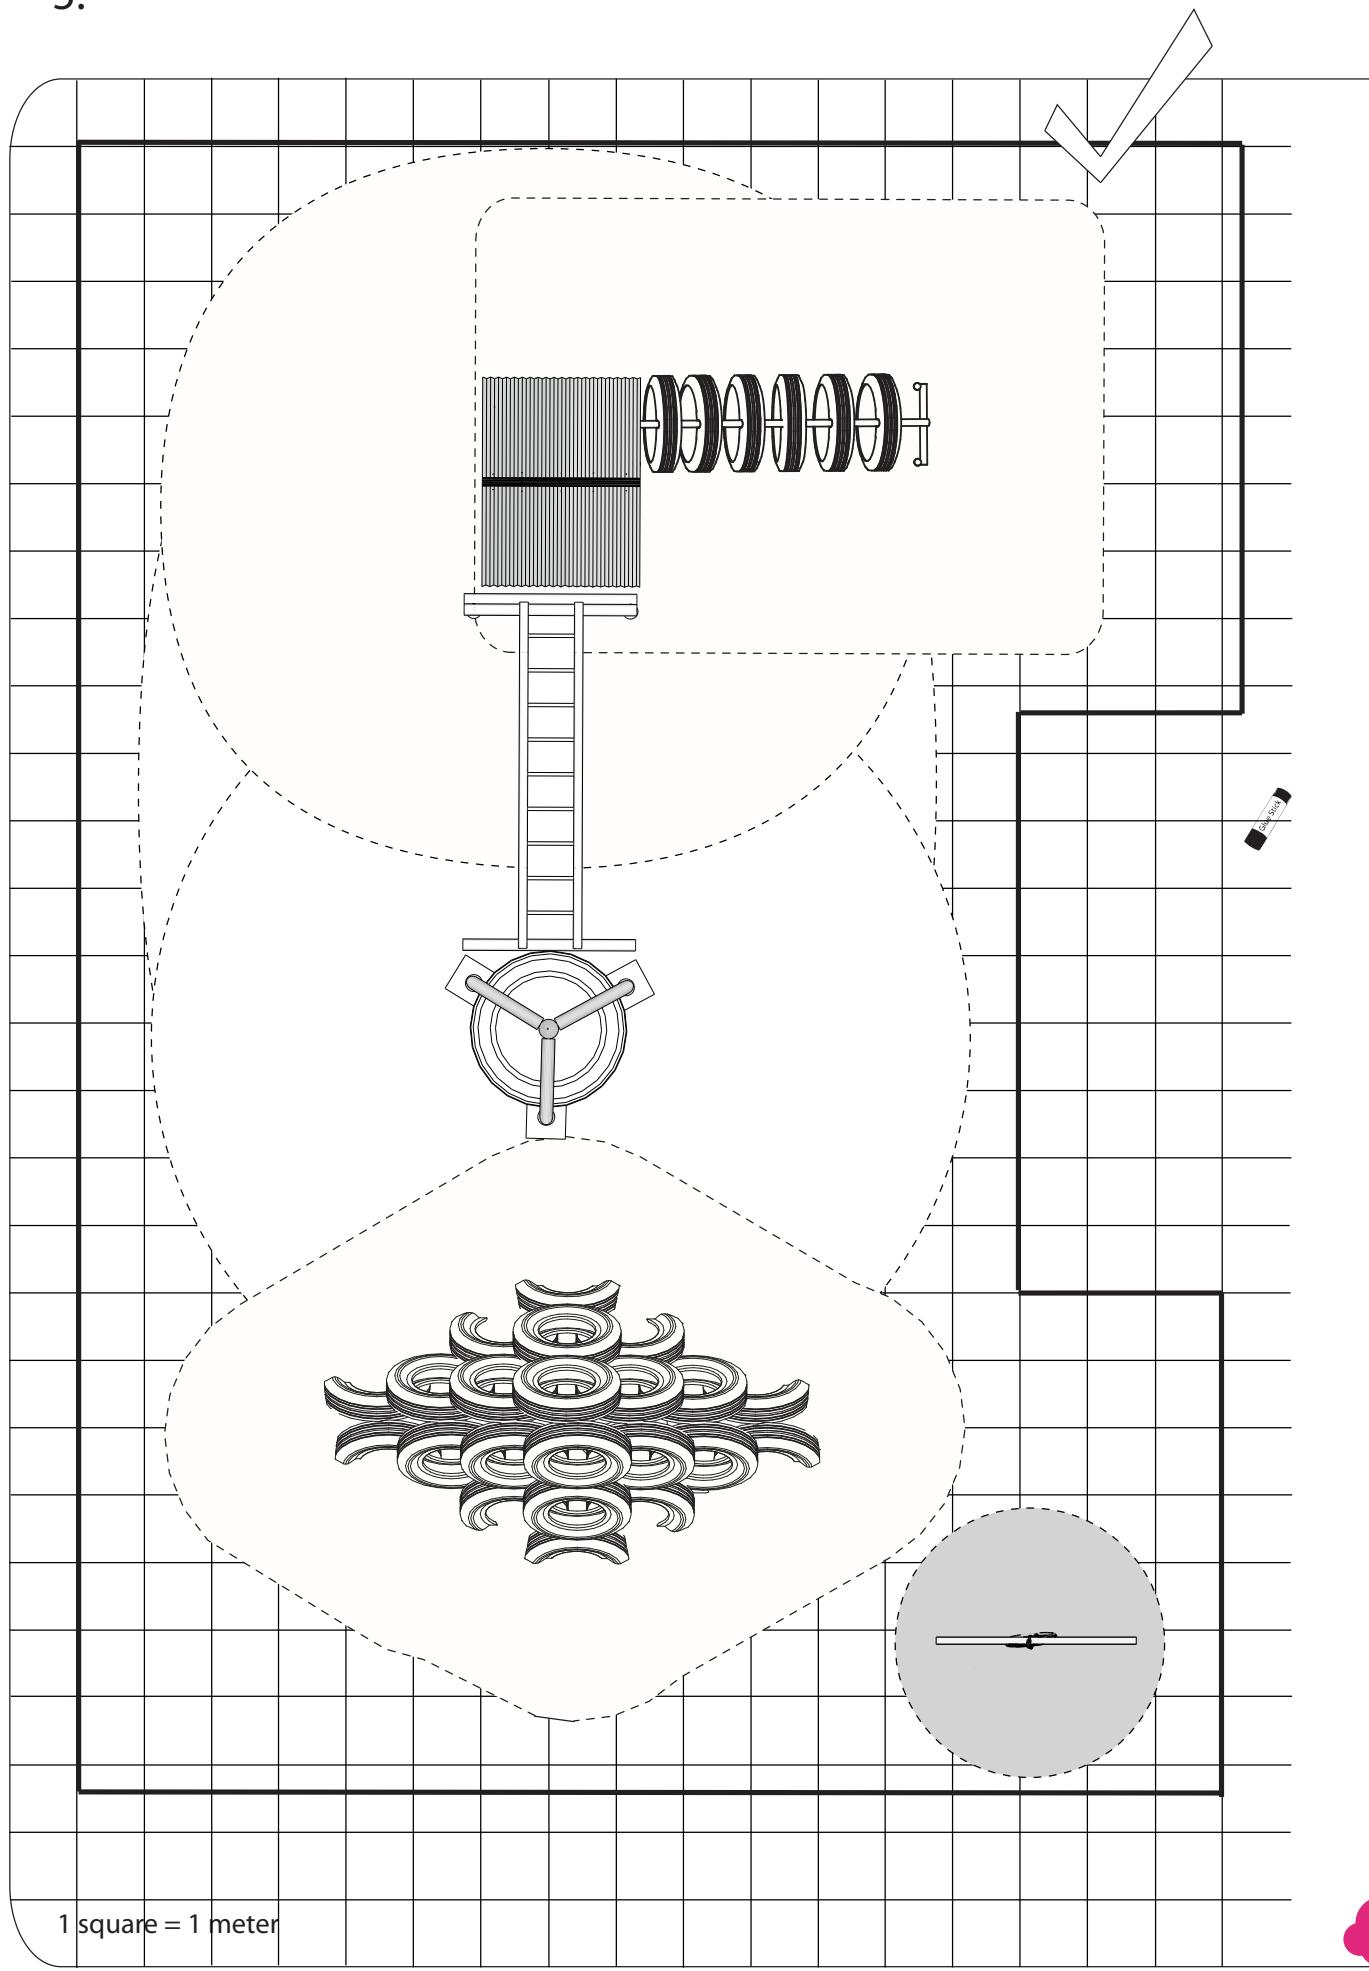

Any element above 600mm or a fast moving element (eg: swing) needs a soft fall zone.

Exception: where elements that are attached to each other, the elements can be within another elements zone and the fall zone becomes the 2 zones combined. eg: cubby and slide

For more information see safety manual at <http://playgroundideas.org/content/basic-page/basic-safety-guidelines>
